

# CB21 SILVER

## General Description

Hexagonal structure polyethylene net containing silver ions  
Low melting point fusible layer

Availability:

- Manufactured in bulk rolls up to 1400mm by 1000m
- Rolls can be slit to customer's requirements

Key Features:

- Contains Silver
- Silver coloured net
- Open structure
- Low melting point bonding layer allows net to be bonded to substrate whilst keeping net structure intact
- Low adherent surface

Property	Test Method	Typical Value
Thickness (micron)	GK01	120
Substance weight (gm <sup>-2</sup> )	GK10	21
Tensile strength MD (gf/cm <sup>-1</sup> )	GK35	700
Tensile strength TD (gf/cm <sup>-1</sup> )	GK35	700
Construction MD, bosses per 25.4mm	GK02	24
Construction TD, bosses per 25.4mm	GK02	31
