

## **H236 BLUE**

## **General Description**

Blue polyurethane film on paper carrier suitable for visually detectable first aid dressings.

| Property                                       | Typical Value                     |
|--|-----------------------------------|
| Thickness (micron)                             | 84                                |
| Weight (g/m²)                                  | 100                               |
| MVTR. upright (g/m² per 24 shrs @ 37°C/98.6°F) | 2000                              |
| Tensile strength MD (gf/cm)                    | 2000                              |
| Tensile strength TD (fg/cm)                    | 2000                              |
| Nominal length at max width (lm)               | 1000                              |
| Maximum width (mm)                             | 1300                              |
| Minimum width (mm)                             | 50                                |
| Carrier  | 92 gsm double sided release paper |
| Liner  | N/A                               |
| Adhesive                                       | N/A                               |
| Stripping load (release) (gf/cm)               | 1.0                               |
| Elongation at break, MD (%)                    | 900                               |
| Elongation at break, TD (%)                    | 900                               |
